Experience

AI Engineer, Genotek
Jun – Jul 2026

Moscow, Russia · AI Genetic Consultant: a two-tier validation system

- Developed an AI-powered genetic consultation agent answering medical and DNA-analysis questions against real patient data.
- Designed a two-tier validation pipeline (embedding similarity, then LLM-as-a-Judge), replacing manual QA with a regression gate across **68** test cases.
- Deployed to production on Kubernetes and Argo Workflows, with per-case scores and run comparisons tracked in Langfuse.
- Onboarded a second, independently built agent through the same adapter with zero pipeline changes.

Data Analyst, Network Data Analytics, Advanced Info Service (AIS)
Jun 2024 – Aug 2025

Bangkok, Thailand · Analytics for Thailand's largest mobile operator

- **Speed Score Simulation:** statistical model of network performance under varying parameters, informing optimization.
- **Network Outage Detection:** anomaly detection on 4G usage to find outage periods for AIS and competitors.
- **Churn Analysis:** crowdsourced data to track customer gains, losses and switching between operators.
- **Spatial Analysis:** village-level coverage report that found underserved areas and shaped expansion plans with cost estimates.
- **Nearby Search API:** Google Places queries compiling bars and pubs nationwide for Premier League campaigns.

ML Engineer intern, E-Machine Management, KBTG
Nov 2023 – Mar 2024

Bangkok, Thailand · Kasikorn Business-Technology Group

- Designed and developed models that predict when a bank's E-Machines will fail, so teams can act before customers find a broken machine: **+58%** service availability.

Projects

Hallucination detection in tool-calling dialogues
Skoltech

End-to-end pipeline generating synthetic annotated data, comparing BERT- and attention-based baselines, and training a span-level classifier that beat existing methods across three hallucination categories.

Geometry-based data selection
Skoltech

Intrinsic Dimensionality scoring and sample selection inside a data-pruning pipeline, removing redundant samples while keeping model performance.

Movie recommender on the Netflix Prize dataset
Skoltech

Matrix factorization with ALS, with pipelines producing top-10 personalized recommendations for warm-start and hot-start users.

Education

Master of Artificial Intelligence and Machine Learning
Sep 2025 – Jun 2027

Skolkovo Institute of Science and Technology (Skoltech), Russia · HRH Princess Maha Chakri Sirindhorn Scholarship, full funding

B.Eng. in Computer Engineering and Informatics
Jul 2020 – Apr 2024

Kasetsart University, Sriracha Campus, Thailand · GPAX 3.83 / 4.00 · 1st Class Honours with a Gold Medal · Dean's List · Distinguished Engineering Student Award, 2023

Competitions

- Young Socialpreneur Hackathon, KU Sriracha: 1st Runner-Up
- CARLA Contest 2023: 2nd Runner-Up
- Tesa Top Gun Rally 2022: Top 10
- M.A.D. Hackathon, Dec 2024: posture-detection prototype in 2 days

Beyond work

- Course instructor, Asian Cultures (Jan 2026)
- Volunteer judge, World Robot Olympiad Thailand (Jun 2023)
- Teaching assistant, Kasetsart University (2022 – 2023)

Skills

Languages & data: Python, SQL, PostgreSQL, Scikit-learn

LLMs & agents: LLMs & Agentic AI, LLM Evaluation, RAG, LangChain, Azure OpenAI, Prompt Engineering

Shipping: Docker, CI/CD (GitHub Actions), Kubernetes, Langfuse

Courses: Predictive AI, LLMs & Human-AI Interaction · KBTG Kampus
